ANIMAL FEED MAKING UNIT

PROJECT REPORT

Of

ANIMAL FEED MAKING UNIT

PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding Animal Feed Making unit.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.

[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

ANIMAL FEED MAKING UNIT

Introduction:

Animal feed is the food given to animals which are domestic often refers to fodder in course of care and management of farm animals by humans for profit. Supply of quality feed ensures the health of animals. Animal feed is the food given to animals which are domestic often refers to fodder in course of care and management of farm animals by humans for profit. Supply of quality feed ensures the health of animals. Various feeds include poultry feed, sheep husbandry, cat food, pet food, pig farming, cattle feeding, dog food, equine nutrition and bird food.

Compound cattle feed is an important constituent of ration, considering the fact that dairy animals in India have limited access to cultivated green fodder and grasses. Most of the macro and micronutrients to meet animals' requirements are provided by compound feed, especially on crop residue-based diets. It is possible to formulate balanced rations for growing and lactating animals only if the feed used conforms to the laid down specifications, for energy, protein, minerals, vitamins, etc.

In order to provide animals with necessary nutrients to meet their requirements for maintenance, growth, pregnancy, and production of milk, to reduce the risks of animal health and to minimize excretions and emissions into the environment, the chemical composition of cattle feed used in the diet has to be precisely known.

Uses & Market Potential:

Worldwide demand for dairy products is rapidly growing and is projected to increase by 58 % by 2050 compared to 2010, due to the strong demand from an emerging global middle class. The Indian animal feed market is driven by the rising dairy industry, backed by the White Revolution 2.0, which has resulted in the rapid growth of the cattle population. Currently, India has the largest cattle population in the world, thereby becoming a significant market for cattle feed. The demand for commercial cattle feed is projected to increase in India, as the dairy industry structure is becoming more organized and which are aimed at improving the overall status of the animal feed industry to provide for future demand. The Indian animal feed market size reached a value of almost INR 403.5 billion in the year 2020. The market is further expected to grow at a CAGR of 15% between 2021 and 2026 to reach a value of almost INR

933.3 billion by 2026. The Indian animal feed market is driven by increasing government support in the country. After the liberalization of the Indian economy in the early 1990s, the animal feed industry was presented with new opportunities. The industry continues to have substantial growth potential owing to increasing domestic consumption of animal-based products, rising livestock population, and growing dependence on imports.

Product:

ANIMAL FEED

Raw Material:

Major raw materials are as follows:

Grains: Wheat, Maize, oats, sorghum, rice, barley, millets, ragi, etc.

Brans: rice polish, De-oiled rice bran, wheat bran, maize bran, etc.

Protein meals/cakes: Rapeseed meal/cake, soybean meal, cottonseed meal/cake (decorticated and un-decorticated), groundnut meal/cake, coconut meal/cake,

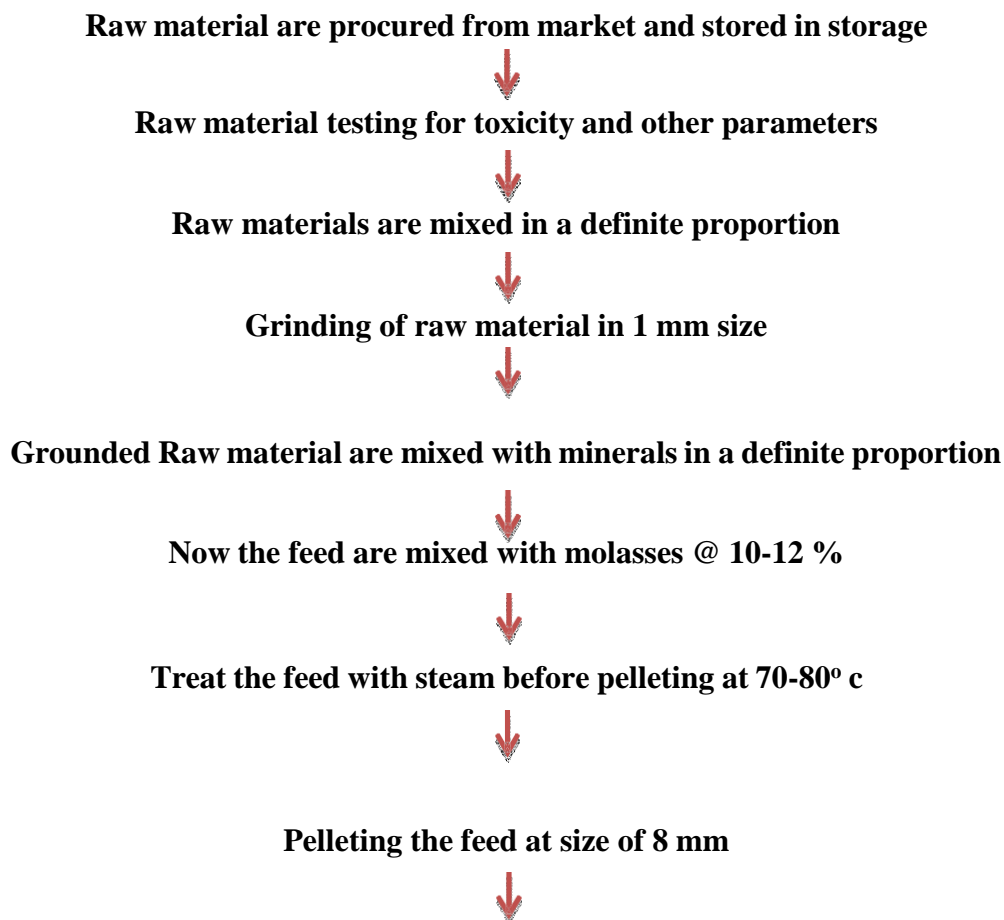

palm kernel, meal/cake, sesame cake, linseed cake, maize germ oil cake, maize gluten meal, sunflower meal, safflower meal, guar meal, etc.

Chunnies: Guar, tur, urad, moong gram & chunnies of other locally available pulses.

Agro-industrial by-products: Molasses, babul chunni, tamarind seed powder, mango kernel extraction, tapioca waste, etc.

Minerals and vitamins: Mineral mixture, calcite powder, common salt, di-calcium phosphate, vitamins A, D & E.

Manufacturing Process:

Testing the feed for (temperature and binding of Pellets)

Filling and packaging

Area:

The industrial setup requires space for Inventory, workshop or manufacturing area, space for power supply utilities and polishing area. Also, some of the area of building is required for office staff facilities, office furniture, etc. Thus, the approximate total area required for complete industrial setup is 1000Sqft

Cost of Machines:

Assumptions:

1. Production Capacity of a Animal Feed making unit is taken at 1200 KG per day. First year, Capacity has been taken @ 70%.
2. Working shift of 8 hours per day has been considered.
3. Raw Material stock and Finished goods closing stock has been taken for 15 days.
4. Credit period to Sundry Debtors has been given for 25-30 days.
5. Credit period by the Sundry Creditors has been provided for 15 days.
6. Depreciation and Income tax has been taken as per the Income tax Act,1961.
7. Interest on working Capital Loan and Term loan has been taken at 11%.
8. Salary and wages rates are taken as per the Current Market Scenario.
9. Power Consumption has been taken at 10 KW.
10. Selling Prices & Raw material costing has been increased by 5% & 3% respectively in the subsequent years.
